It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.</p> <div><div>Typically lower rewards, lower risk</div><div>Typically higher rewards, higher risk</div></div> <table><tr><td>1</td><td>2</td><td>3</td><td>4</td><td>5</td><td>6</td><td>7</td></tr></table> <ul style="list-style-type: none">• The Fund is ranked as 6 because it has experienced relatively high rises and falls in value over the past five years. Please note that even the lowest ranking does not mean a risk-free investment.• The Fund holds equities concentrated by number and by location in the UK. Equities, as an asset class, tend to experience higher volatility than many other assets such as bonds or money market instruments. Funds concentrated by number of assets and/or geographic location are more vulnerable to market sentiment impacting on one or more of those assets or location and can carry a higher risk than funds holding more diversified assets.• All of the risks currently identified as being applicable to the Fund are set out in the 'Risk Factors' section of the Prospectus.	1	2	3	4	5	6	7
