

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Investec Strategic Bond Fund

A sub-fund of Investec Funds Series i
Managed by Investec Fund Managers Limited

Class A Accumulation shares in sterling
ISIN: GB0031075004

Objectives and investment policy

- The Fund aims to provide an income.
- The Fund invests around the world primarily in bonds (contracts to repay borrowed money which typically pay interest at fixed times) issued by governments or companies.
- The Fund may use derivatives (financial contracts whose value is linked to the price of an underlying asset) for investment purposes.
- The bonds invested in are primarily of investment grade (high quality) as rated by credit rating agencies (companies that rate the ability of the issuers of bonds to repay borrowed money) but may also be below investment grade.
- The Fund is managed to minimise any currency risk (a form of risk that arises from the change in price of one currency against another) in sterling.
- The Investment Manager is free to choose how the Fund is invested and does not manage it with reference to an index.
- Any income due from your investment is reflected in the value of your shares rather than being paid out.
- You can buy or sell shares in the Fund on any business day in the UK, as defined in the Investec Funds Series omnibus prospectus (section 3).
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within the short to medium term.

Risk and reward profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean 'risk free'.
- The value of your investment and any income from it can fall as well as rise and you are not certain of making profits; losses may be made.
- The Fund appears towards the lower end of the Risk and Reward Indicator scale. This is because it invests in bonds whose returns tend to fluctuate more than those of cash funds but less than those of funds which invest in the shares of companies.
- Risks that may not be fully captured by the Risk and Reward Indicator:**
- Default:** There is a risk that the issuers of fixed income investments (e.g. bonds) may not be able to meet interest payments nor repay the money they have borrowed. The worse the credit quality of the issuer, the greater the risk of default and therefore investment loss.
 - Derivative counterparty:** A counterparty to a derivative transaction may fail to meet its obligations to the Fund thereby leading to financial loss.
 - Derivatives:** The use of derivatives may increase the overall risk in the Fund by multiplying the effect of both gains and losses. This may lead to large changes in the value of the Fund and potentially large financial loss.
 - Developing market:** Some of the countries in which the Fund invests may have less developed legal, political, economic and/or other systems. These markets carry a higher risk of financial loss than those in countries generally regarded as being more developed.
 - Interest rate:** The value of fixed income investments (e.g. bonds) tends to decrease when interest rates and/or inflation rises.
 - Third party operational:** The Fund's operations depend on third parties. Investors in the Fund may suffer disruption or financial loss in the event of third-party operational failure.
- The full list of the Fund's risks are contained in Appendix VII of Investec Funds Series omnibus prospectus.
