## JPM US Dynamic A (dist) - USD a Share Class of JPMorgan Funds – US Dynamic Fund a Sub-Fund of JPMorgan Funds

ISIN LU0169523114

The management company is JPMorgan Asset Management (Europe) S.à r.l.

### Objectives and Investment Policy

**Investment Objective:** The Sub-Fund aims to maximise long-term capital growth by investing primarily in an aggressively managed portfolio of US companies.

**Investment Policy:** At least 67% of the Sub-Fund's assets (excluding cash and cash equivalents) will be invested in equity securities of companies that are domiciled in, or carrying out the main part of their economic activity in, the US.

The Sub-Fund may also invest in Canadian companies.

The Sub-Fund uses an active investment process that is based on systematic investment in equity securities with specific style characteristics such as value and momentum, that are associated with long-term outperformance caused by the impact of psychological factors on stock markets.

The Sub-Fund may invest in assets denominated in any currency and currency exposure may be hedged.

The Sub-Fund may use financial derivative instruments for the purposes of hedging and efficient portfolio management.

**Redemption and Dealing:** Shares of the Sub-Fund may be redeemed on demand, with dealing normally on a daily basis.

**Management Discretion:** The Investment Manager has the discretion to buy and sell investments on behalf of the Sub-Fund within the limits of the Objective and Investment Policy.

**Benchmark:** The benchmark of the Share Class is S&P 500 Index (Total Return Net of 30% withholding tax).

The benchmark is a point of reference against which the performance of the Share Class may be measured. The Share Class may bear little resemblance to its benchmark.

**Distribution Policy:** This Share Class will normally pay dividends.

**Recommendation:** The Sub-Fund may not be appropriate for investors who plan to withdraw their money within five years.

### Risk and Reward Profile

The above rating is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and may not be a reliable indication of the future risk profile of the Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

**Why is this Share Class in this category?** This Share Class is classified in category 6 because its Net Asset Value has shown high fluctuations historically.

#### Other material risks:

- The value of your investment may fall as well as rise and you may get back less than you originally invested.

- Because the Sub-Fund is aggressively managed, volatility may be high as the Sub-Fund may take larger position sizes, may have high turnover of holdings and at times may have a significant exposure to certain areas of the market.
- The value of equity securities may go down as well as up in response to the performance of individual companies and general market conditions.
- The single market in which the Sub-Fund invests may be subject to particular political and economic risks, and as a result, the Sub-Fund may be more volatile than more broadly diversified funds.
- Movements in currency exchange rates can adversely affect the return of your investment. The currency hedging that may be used to minimise the effect of currency fluctuations may not always be successful.
- Further information about risks can be found in "Appendix IV - Risk Factors" of the Prospectus.
