

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Royal London European Opportunities Fund (Accumulation - Class M Shares)

A sub-fund of Royal London Equity Funds ICVC ISIN: GB00B3BVQM68
Managed by Royal London Unit Trust Managers Limited

Objectives and investment policy

Objective The Fund's investment objective is to achieve a total return over the medium term (3-5 years) by investing at least 80% in the shares of European companies, not including the UK, listed on European stock exchanges. The Fund's performance target is to outperform, after the deduction of charges, the FTSE Europe ex-UK Total Return GBP Index (the "Index") over rolling 5-year periods (2). For further information on the Fund's index, please refer to the Prospectus.

The Fund is actively managed.

Policy At least 80% of the Fund will be invested in the shares of European companies, not including the UK. European companies are those domiciled in Continental Europe, or which have significant European business operations. The Fund will typically invest in larger companies worth €2 billion or more. The Fund may invest up to 5% in other investment funds, known as collective investment schemes (including exchange traded funds). Small investments can also be made in other transferable securities (including both government and public securities), cash and deposits.

The Fund may also invest a small amount of its portfolio in derivatives (investments that derive their value from another closely related underlying investment) for the purposes of efficient portfolio management (EPM).

Recommendation The Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Concepts to understand

Total Return A total return is a combination of capital growth and income. Capital growth is defined as the rise in an investment's value over time and income as the payment an investment generates, such as dividends or bond coupons.

Rolling 5 Year Period A rolling 5-year period is any period of five years, no matter which day you start on.

Efficient Portfolio Management A list of approved investment techniques, including the use of derivatives, used to protect against excessive risk, reduce cost or generate extra income or growth.

You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.

Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

Risk and reward profile

The fund is shown in risk category 5 because its share price has shown a medium to high level of volatility historically. The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund. As an investment, shares are typically more volatile than money market instruments and bonds.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The indicator is calculated using a standard methodology that is used by all companies offering such funds in Europe.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

Concentration Risk Funds which invest in a smaller number of securities can carry more risk than funds spread across a larger number of companies. To the extent that the Fund has exposure to an issuer, geographical area or type of security that is heavily affected by an event, either positive or negative, its value may rise or fall.

Exchange Rate Risk Investing in assets denominated in a currency other than the base currency of the Fund means the value of the investment can be affected by changes in exchange rates.

Liquidity Risk In difficult market conditions the value of certain fund investments may be less predictable than normal. In some cases this may make such investments harder to sell at the last quoted market price, or at a price considered to be fair. Such conditions could result in unpredictable changes in the value of your holding.

For more about fund risks, see the "Risk Factors" section in the Prospectus (www.rlam.co.uk/Home/Individual-Investor/Fund-Performance--Prices/)

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest:

Entry charge None

Exit charge None

Charges taken from the fund over a year:

Ongoing charge 0.75%

Charges taken from the fund under specific conditions:

Performance fee None

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Ongoing charge is based on the Fund Management Fee (FMF), which is the periodic fee paid to the ACD to cover the expenses of the Fund. This figure does not include portfolio transaction costs. Ongoing charges are the same for all investors in the share class.

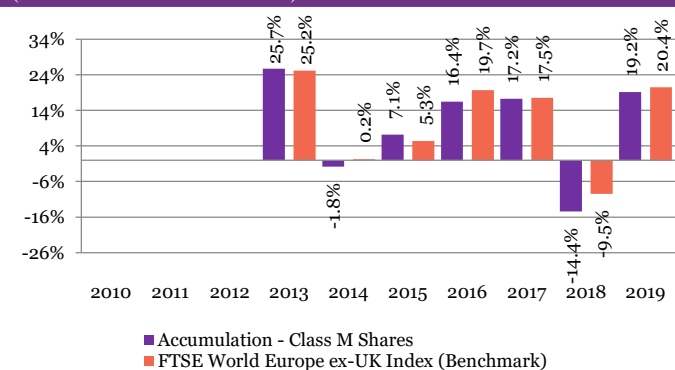

For more about charges, see the expenses section in the full Prospectus and supplement (www.rlam.co.uk/Home/Individual-Investor/Fund-Performance--Prices/)

Past performance

The graph shows fund performance over the past 10 years where available. The figure for a given year shows how much the Fund increased or decreased in value during that year. These results reflect ongoing charges taken from the Fund, but do not reflect any entry charges you might have to pay.

The Fund was launched on 11 September 2008 as a unit trust and converted to an open-ended investment company (OEIC) on 30 October 2009. The share class launched on 1 May 2012.

The Royal London European Opportunities Fund
(Accumulation - Class M Shares) in GBP

On 1 July 2014 the Fund's investment objective and policy changed to reflect a more concentrated management approach. The past performance shown in the table relates to the period prior to the change to the objective. Performance relating to the new objective will be shown once there is sufficient history.

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in British pounds after the ongoing charges and the portfolio transaction costs have been paid. Entry and exit charges are excluded from calculations of past performance.

Practical information

Depository: HSBC Bank plc

Additional Information: This Key Investor Information Document (KIID) may not contain all the information you need. For additional information on this fund (including the Supplementary Information Document), on other share classes of this fund and on other funds, or to obtain a free copy of the Fund's Prospectus or the annual and semi-annual shareholder reports, call the information line or write to the registered office, details of which are below. Alternatively, visit www.rlam.co.uk. The Prospectus and shareholder reports are in English.

This document describes one share class of the Fund. The Prospectus and annual and semi-annual shareholder reports are prepared for the entire fund across all share classes.

For fund performance and most recent share price, visit www.rlam.co.uk.

Should you wish to switch share classes or funds, please see the "Switching" section of the Prospectus for details.

Tax: Investors should note that the tax legislation that applies to the Fund may have an impact on the personal tax position of their investment in the Fund. Contact your adviser to discuss tax treatment, suitability of this investment, and other questions.

Notices: Royal London Unit Trust Managers Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus for the UCITS.

The Fund is a sub-fund of Royal London Equity Funds ICVC (a UCITS umbrella company). The prospectus and long reports (shareholder reports) are prepared for the entire company. The assets and liabilities of each sub-fund are segregated by law. Therefore, the assets of the Fund belong exclusively to it and are not available to meet the liabilities of any other fund of Royal London Equity Funds ICVC.

The Fund is authorised in the United Kingdom and regulated by the Financial Conduct Authority (FCA).

Details of the Company's remuneration policy are available at www.rlam.co.uk including: (a) a description of how remuneration and benefits are calculated; and (b) the identities of persons responsible for awarding remuneration and benefits. A paper copy of these details may be obtained, free of charge, on request from the Company, at the address below.
