db x-trackers RUSSELL 2000 UCITS ETF

Share Class: 1C (ISIN: LU0322248658), (WKN: DBX1AB), (Currency: USD)

a sub fund of db x-trackers. The Fund is managed by DB Platinum Advisors, part of the Deutsche Bank Group.*

Objectives & Investment Policy

The aim is for your investment to reflect the performance of the Russell 2000® Index (Index) which is designed to reflect the performance of the shares of certain companies included on the Russell 3000® Index (Underlying Index).

The Underlying Index comprises the 3000 largest shares of US companies, based on the combined value of a company's shares compared to other companies. The Index comprises the 2000 smallest companies which are included in the Underlying Index. A company's weighting in the Index depends on its relative size based on the combined value of a company's readily available shares as compared to other companies. The share must be listed

on a major US stock exchange and must meet minimum trading price and activity criteria. Certain non US companies are permitted to be included. The composition of the Index is reviewed at least annually.

To achieve the aim, the Fund will invest in transferable securities and enter into derivatives with Deutsche Bank relating to the transferable securities and the Index, in order to obtain the return on the Index.

No dividends will be paid on your shares.

You may redeem your shares on demand on a daily basis.

Risk and Reward Profile

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 6 because of the high range and frequency of price movements (volatility) of the underlying investments referenced by the Fund.

The following are additional risks not covered by the risk and reward category.

The Fund does not invest directly in the components of the Index and its returns will be dependent on the performance of the derivatives used.

The Fund will enter into a derivative with a counterparty (initially Deutsche Bank). If the counterparty fails to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss.

Deutsche Bank and its related companies may act in several roles in relation to the Fund such as distributor, derivative counterparty and management company which may involve conflicts of interest.

The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up.

The value of an investment in shares will depend on a number of factors including, but not limited to, market and economic conditions, sector, geographical region and political events.

This is the Fund's presentation of the data. Russell Investments is not responsible for the formatting or configuration of this material or for any inaccuracy in the Fund's presentation thereof.

The financial contract (known as a derivative) used to gain exposure to the Index may be adjusted to reflect certain expenses in relation to taxes and/or buying, selling, borrowing, financing or custody costs associated with the counterparty's hedging position. These index replication costs may lead to your investment suffering losses.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.
