

## Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

PIMCO

# UK Income Bond Fund

a sub-fund of PIMCO Select Funds plc  
PIMCO Global Advisors (Ireland) Limited, part of Allianz, manages this fund.

ISIN: IE00B3RPBL66

Share class: Institutional GBP Accumulation

## Objectives and Investment Policy

**Objective** The fund aims to maximise current income while preserving and, as a secondary objective, increasing the amount originally invested, consistent with prudent investment management.

**Investment Policy** The fund invests primarily in a range of fixed income securities (which are loans that pay a fixed or variable rate of interest) issued by companies or governments from around the world that provide a consistent and increased level of income. Securities will mainly be priced in sterling but the fund may hold other currencies as well as securities that are priced in other currencies. In determining the maturity of the fund's investments, the investment advisor will choose securities with varying repayment dates based on its expectations for interest rate changes.

The fund may invest in emerging markets, which in investment terms are those economies that are still developing.

The fund may invest in instruments such as convertible bonds, including contingent convertible bonds, which are bonds that can be converted into shares.

The fund may invest in both "investment grade" and "non-investment grade" securities, as determined by international ratings agencies. Investment grade securities, whilst potentially producing a lower level of income than non-investment grade securities, they are also considered to be of lower risk. Non-investment grade securities are generally considered to be riskier investments but may pay a higher income.

The fund intends to measure its performance against the Bloomberg Sterling Aggregate 1-10yr Bond Index (the "Index"). The fund is considered to be actively managed in reference to the Index by virtue of the fact that it uses the Index for performance comparison purposes. Certain of the fund's securities may be components of and may have similar weightings to the Index. However the Index is not used to define the portfolio composition of the fund or as a performance target and the fund may be wholly invested in securities which are not constituents of the Index.

The fund may invest in derivative instruments (such as futures, options and swaps) rather than directly in the underlying securities themselves. The derivatives return is linked to movements in the underlying assets.

**For full investment objectives and policy details please refer to the prospectus.**

**Distribution Policy** This share class does not pay out a distribution. Any investment income generated will be reinvested.

**Dealing Day** You can buy and sell shares on most working days in Dublin, exceptions to this are more fully described in the fund holiday calendar available from the Administrator.

## Risk and Reward Profile

< Lower risk

Typically lower rewards

Higher risk >

Typically higher rewards

The indicator above is not a measure of the risk of capital loss, but a measure of the fund's price movement over time.

- It is based on historical data and thus may not be a reliable indication for the future.
- The indicated risk category is not guaranteed and may shift over time.
- The indicator is designed to help investors understand the uncertainties both for loss and for growth that may affect their investment. In this context, the lowest category does not mean "risk free".
- The risk indicator is based on the volatility of the fund's performance over the last 5 years. Where 5 years' performance history is not available the data is supplemented by benchmark data or simulated historical series as appropriate.
- The fund does not provide its investors with any guarantee on performance, nor on the monies invested in it.

**In addition to the risk captured by the indicator, the overall fund value may be considerably affected by:**

**Credit and Default Risk** A decline in the financial health of an issuer of a fixed income security can lead to an inability or unwillingness to repay

a loan or meet a contractual obligation. This could cause the value of its bonds to fall or become worthless. Funds with high exposures to non-investment grade securities have a higher exposure to this risk.

**Currency Risk** Changes in exchange rates may cause the value of investments to decrease or increase.

**Derivatives and Counterparty Risk** The use of certain derivatives could result in the fund having a greater or more volatile exposure to the underlying assets and an increased exposure to counterparty risk. This may expose the fund to larger gains or losses associated with market movements or in relation to a trade counterparty being unable to meet its obligations.

**Emerging Markets Risk** Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty and operational risk. Investments in these markets may expose the fund to larger gains or losses.

**Interest Rate Risk** Changes in interest rates will usually result in the values of bond and other debt instruments moving in the opposite direction (e.g. a rise in interest rates likely leads to fall in bond prices).

**Liquidity Risk** Difficult market conditions could result in certain securities becoming hard to sell at a desired time and price.

**Mortgage Related and Other Asset Backed Securities Risks** Mortgage or asset backed securities are subject to similar risks as other fixed income securities, and may also be subject to prepayment risk and higher levels of credit and liquidity risk.

## Charges

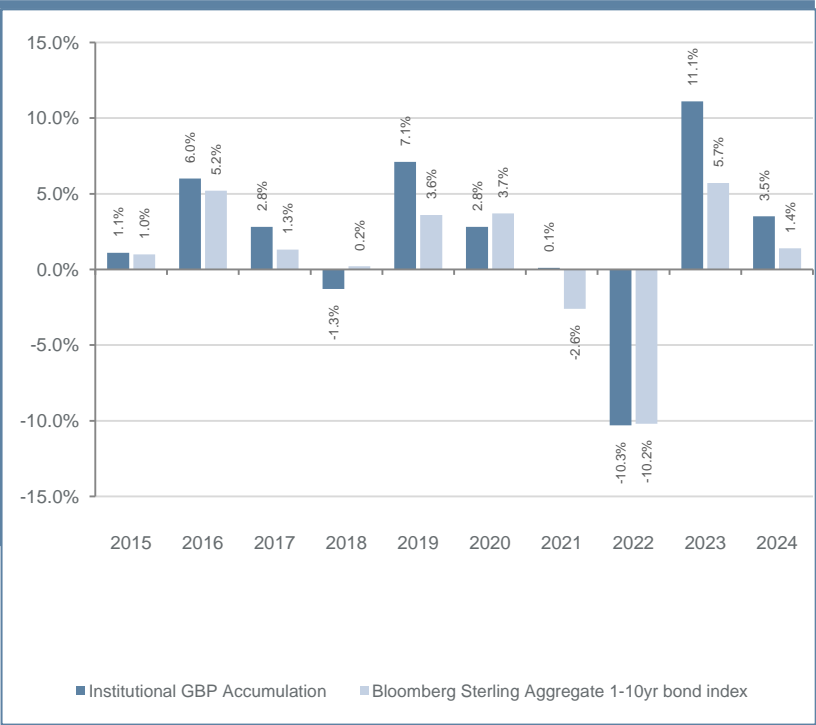

The charges you pay are used to pay for the costs of running the fund, which include the marketing and distributing costs. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	5.00%
Exit charge	None
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	0.49%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The ongoing charges figure is based on expenses for the year ending 2024. This figure may vary from year to year. It excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges, please see the section of the prospectus entitled "Fees and Expenses", which is available at [www.europe.pimco-funds.com](http://www.europe.pimco-funds.com).

## Past Performance

- Past performance is not an indicator of future returns.
- Past performance does not take into account any entry, exit or switching charges but does take into account the ongoing charge, as shown in the Charges section.
- The performance of the class is calculated in British Pounds.
- The Fund launched in February 2011. This class started to issue shares in February 2011.

## Practical Information

**Depository** State Street Custodial Services (Ireland) Limited.

**Prospectus and further information** Further information on the fund or other share classes or sub-funds of the Company, including the prospectus, the most recent annual report and subsequent semi-annual reports of the Company, may be obtained from the Administrator, as are the latest share prices.
