iShares S&P CNX Nifty India Swap

A sub-fund of iShares IV plc

Exchange Traded Fund (ETF)

ISIN: IE00B3YX1R94

DE000A1H53K1 (Deutsche Börse)

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- ▶ The Fund will commence termination with effect from 23 September 2013. Investors of the Fund have been notified.
- ▶ The Fund aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the S&P CNX Nifty, the Fund's benchmark index.
- ▶ The benchmark index is designed to measure the performance of the largest and most liquid Indian equity securities (e.g. shares) issued by blue chip companies listed on the National Stock Exchange of India Ltd (NSE). These companies account for 25 diversified sectors of the Indian economy. Securities that are liquid mean that they can easily be bought or sold in the market in normal market conditions. As of November 2012, the benchmark index included 50 of the approximately 1300 companies listed on the NSE, captured approximately 60% of the NSE's free float-adjusted market capitalisation and is intended to be a reflection of the Indian stock market. Free float-adjusted market capitalisation is the share price of the company multiplied by the number of shares available to investors rather than all of the company's issued shares.
- ▶ The Fund invests in financial derivative instruments (i.e. investments the prices of which are based on one or more underlying assets), and will in particular invest in swap agreements, in order to achieve its

investment objective. A swap agreement is typically used to achieve a specified return determined by an underlying such as a share price or a return on an index.

- ▶ The Fund may, in future, also invest directly in equity securities which make up the benchmark index and/or gain exposure to them using instruments such as American Depositary Receipts (ADRs), Global Depositary Receipts (GDRs) and other funds. ADRs and GDRs are instruments issued by financial institutions which give exposure to underlying equity securities. To the extent the Fund invests directly in the equity securities that make up the benchmark index, the Fund will aim to replicate the benchmark index by holding these in similar proportions to it.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your shares will be accumulating shares (i.e. dividend income will be included in their value).
- ▶ The Fund's base currency is US Dollar.
- ▶ The Fund's shares are listed and traded on one or more stock exchanges. In normal circumstances, only authorised participants (e.g. select financial institutions) may buy and sell shares directly with the Fund. Other investors can buy or sell shares daily through an intermediary on stock exchange(s) on which the shares are traded.

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated seven due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets and failed/delayed delivery of securities or payments to the Fund.

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.
- Swap agreements can give rise to 'Counterparty Risk' which will increase in circumstances where the Fund is not able to transact with multiple counterparties. 'Credit Risk' will arise if the counterparty fails to provide sufficient assets as security for amounts owed to the Fund.

- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

For more information on risks, please see the Fund's prospectus, which is available at www.ishares.com.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

* Not applicable to secondary market investors. Investors dealing on a stock exchange will pay fees charged by their stock brokers. Such charges are publicly available on exchanges on which the shares are listed and traded, or can be obtained from stock brokers.

* Authorised participants dealing directly with the Fund will pay related transaction costs. Authorised participants switching between the Fund and other funds within the same umbrella investment company may be subject to a switching fee of up to 3%. However, the switching fee may not be charged and the usual entry and exit charges may apply instead.

The ongoing charges figure is based on expenses for the twelve month period ending 30 August 2013. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

For more information on charges, please see the Fund's prospectus, which is available at www.ishares.com.
