Investment Policy

The Fund invests worldwide in debt securities of listed financial companies and companies which provide support services to such financial sector companies. The Fund may also invest in companies which derive a substantial proportion of their profits from the financial sector.

The Fund focuses on bonds issued by financial companies such as banks and building societies. These include Additional Tier 1 debt (AT1) and Restricted Tier 1 debt (RT1) both of which are also known as CoCos or Contingent Convertible Bonds, Core Capital Deferred Shares, preference shares, perpetual preferred stock, trust preferred securities, convertible loan stock, government bonds, including supra-national or municipality bonds, exchange traded funds (ETFs), exchange traded notes, business development companies and investment companies.

The Fund may invest in financial derivatives (complex instruments based upon the value of underlying assets) for hedging, to reduce

risk, to manage the Fund more efficiently, or to gain exposure to securities in a more efficient way.

The Fund is actively managed and uses the ICE BofA Global Financial Index (GBP) benchmark as a reference index for performance measurement.

Risk and Reward Profile

Why is this fund in this category?

The risk category above is calculated in accordance with the UCITS Regulations and based on the risk limit of the Fund.

In addition to the risk captured by the indicator, the overall Fund value may be considerably affected by:

Interest Rate Risk - interest rate movements affect the value of bond investments in the Fund. Typically, the value of a bond will fall if interest rates rise.

Credit Risk - there may be times where the issuer or guarantor of a bond cannot meet its payment obligations or have their credit-rating downgraded, resulting in losses for the Fund.

Emerging Markets Risk - emerging market countries face more political, economic or structural challenges than developed countries. Investments in such countries may offer higher potential for gains or losses, and markets may be less liquid.

Derivative Risk - certain derivatives may result in gains or losses that are greater than the original amount invested. Derivatives also

involve counterparty risk, which is the risk that a counterparty to the derivative contract cannot meet its contractual obligations.

Currency Risk - the Fund invests in assets denominated in currencies other than the Fund’s base currency. Changes in exchange rates may have a negative impact on the Fund’s investments. If the share class currency is different from the currency of the country in which you reside, exchange rate fluctuations may affect your returns when converted into your local currency.

What do these numbers mean?

The risk indicator was calculated using historical data and may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time. A category 1 fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited. With a category 7 fund, the risk of losing your money is high but there is also a chance of making high gains. The numerical scale is complex, for example, 2 is not twice as risky as 1.
