### Sarasin Global Equity Real Return, a sub-fund of Sarasin Funds ICVC Class A Acc

ISIN:GB00B13GW945

This Fund is managed by Sarasin Investment Funds Limited

## Objectives and Investment Policy

### Objective

We seek to grow the Fund by 4% per year more than the Consumer Price Index (CPI) over a rolling 5 year period after deducting fees and costs.

### Investment Policy

In normal market conditions we invest at least 75% of the Fund in the shares of companies from around the world. We may however hold more or substantially less than 75% of the Fund in shares when we deem it appropriate in order to manage difficult market conditions. We also invest in derivatives to manage the risk associated with investments in shares. Derivatives are financial contracts whose value is linked to the price of another asset (e.g. indices, rates, share prices, currencies). We may also invest in cash or bonds or units in funds (including those managed by Sarasin).

We select companies from any country/region, sector or industry. We identify the long-term investment themes that drive growth and lead to disruption in global economies and industries. We select companies based on our own analysis of which are most likely to benefit from these themes, and are well placed to grow their revenues and cash flows as a result of them.

Integral to this analysis is an in-house tool devised to examine and quantify any material environmental, social and/or governance ("ESG") factors. A comprehensive assessment of the related risks and opportunities resulting from these factors are then embedded within our financial modelling and analysis of companies.

The Fund will not therefore always exclude holdings for which material environmental, social and/or governance risks have been identified.

We engage as far as possible with companies to promote actions to mitigate material ESG risks identified with priority given according to the

materiality of our concern, the size of our holding, and also our view of the ability for engagement to have a meaningful impact.

Voting is integral to our engagement work and we seek to ensure our voting is aligned with our engagement priorities.

We use derivatives to adjust how sensitive the Fund is to changes in currencies - whether to act on opportunities or control risk, to gain cost-effective access to investments, and to generate income.

We usually aim for the Fund's exposure to Sterling to be the same as the blended benchmark (around 55%).

The Fund's performance can be assessed by reference to a blended benchmark of:

- 60% - MSCI All Countries World Index (NTR);
- 15% - MSCI All Countries World 100% Hedged to GBP;
- 17.5% - Bank of England SONIA;
- 7.5% - Bank of England SONIA +2%

### Distribution Policy

Any income due from your investment is reflected in the value of your shares rather than being paid out.

### Dealing Frequency

You can buy and sell shares in the Fund before 12 noon GMT on any business day in London.

### Recommendation

This Fund may not be appropriate for investors who plan to withdraw their money within 5 years. For full investment objectives and policy details please refer to the Prospectus. For further details on the Fund's sustainability approach please refer to the SDR Consumer Facing Disclosure document.

## Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and return, calculated using the volatility of monthly returns over five years. As it is based upon how the fund has performed in the past, you should note that the fund may well perform differently in the future. The risk category shown is not guaranteed and may shift over time.

The higher the rank the greater the potential reward but the greater the risk of losing money. The lowest risk number does not mean risk free.

The Fund is ranked at 5 reflecting observed historical returns. The fund is in this category because it has shown higher levels of volatility historically.

The following risks may not be fully captured by the Indicator:

- Emerging markets risk: Emerging markets may face more political, economic or structural challenges than developed markets. Shares may also be less liquid, meaning investments may not be sold quickly enough to prevent or minimize a loss. As a result, investing in emerging markets may involve a higher risk than investing in developed markets.
- Small cap equities risk: Shares of smaller companies can be riskier, as they may be more difficult to buy and sell, and their prices may fluctuate more than those of larger companies.

- Alternatives risk: The fund may invest in alternative assets that are difficult to sell quickly, challenging to value, and subject to higher fees. These assets may also contribute to greater price volatility compared to traditional assets such as equities, fixed income and cash. Such conditions could lead to unpredictable changes in the value of your holdings.
- Derivatives: Derivatives are financial instruments whose value is linked to the expected future price movements of an underlying asset. Derivatives such as futures, forward contracts, options, and swaps may be used to seek to manage risk within the fund, reduce investment costs and generate additional income. However, these strategies may not be successful and could lead to losses greater than the cost of the derivative.
- Exchange Traded Funds (ETFs) risk: ETFs are subject to market fluctuations and the risks of their underlying investments. They are also subject to management fees and other expenses.
- Operational risk: Operational risks arising from failures or delays in processes and systems, or the failure of a third-party provider may affect the value of your investments. If compensation is required to due failures, payments may be delayed.
- Counterparty and settlement risk: The fund could lose money if a counterparty with which it transacts with becomes unwilling or unable to repay money owed to the fund.
- Charges deducted from capital: The fund has charges deducted from capital, which may reduce the potential for growth.
- Further disclosure: Further details of the risks that apply to the fund can be found in the fund's Prospectus.
