FRANKLIN
TEMPLETON

FTF Martin Currie Japan Equity Fund

Class X Accumulation (Hedged)

ISIN: GB00B99C0657

A sub-fund of: Franklin Templeton Funds II (the "Company")

Managed by: Franklin Templeton Fund Management Limited, part of the Franklin Templeton group of companies.

Objectives and Investment Policy

Objective

The fund's goal is to achieve growth of your investment.

Investment Policy

- The fund will invest at least 80% in shares of Japanese companies that the investment manager believes to have potential to experience above-average growth compared to Japanese companies as a whole.

Share Class Policy

- For this share class, the fund will use derivatives to help to reduce the risk of movements in exchange rates between the currencies that are significant to the fund's investment strategy and the currency of the share class (hedging). Hedging transactions can expose the share class to additional risks which may result in loss to your investment.

Benchmark: Japan TSE 1st Section (TOPIX) Index

Manager's Discretion: The fund is actively managed, and the investment manager is not constrained by the benchmark. The fund uses the benchmark for performance comparison purposes. While many of the fund's investments will be components of the benchmark, the weightings of the fund's holdings may differ materially from the weightings in the benchmark. The fund may also invest in securities that are not included in the benchmark. The fund's percentage exposures to sectors and industries may differ materially from those of the benchmark.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Dealing Frequency: You can buy, sell and switch your shares on each day that the London Stock Exchange is open for business.

Minimum Initial Investment: For this share class the minimum initial investment is GBP 3,000.

Treatment of Income: Income and gains from the fund's investments are not paid but instead are reflected in the fund's share price.

Risk and Reward Profile

The indicator is based on the volatility of the returns (past performance) of the reported share class (calculated on a 5 year rolling return basis). Where a share class is inactive / has less than 5 years of returns, the returns of a representative benchmark are used.

There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund.

The lowest category does not mean a risk-free investment.

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

The fund is in its risk/reward category because a concentrated investment (the fund holds fewer investments than many other funds) in shares of small cap Japanese companies from various sectors have historically been subject to large fluctuations in value.

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

Liquidity: In certain circumstances it may be difficult to sell the fund's investments because there may not be enough demand for them in the markets, in which case the fund may not be able to minimise a loss on such investments.

Investment in company shares: The fund invests in shares of companies, and the value of these shares can be negatively affected

by changes in the company, its industry or the economy in which it operates.

Geographical focus: This fund invests primarily in Japan, which means that it is more sensitive to local economic, market, political or regulatory events in Japan, and will be more affected by these events than other funds that invest in a broader range of regions.

Investment in smaller company shares: The fund buys shares in smaller companies. It may be difficult to sell these shares, in which case the fund may not be able to minimise a loss on such shares.

Concentrated fund: The fund invests in fewer companies than other funds which invest in shares usually do. This means that the fund does not spread its risk as widely as other funds and will therefore be affected more if an individual company has significant losses.

Fund operations: The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets.

Hedged class currency: The value of your investment may fall due to changes in the exchange rates between the currencies that are significant to the fund's investment strategy and the currency of your share class, pound sterling. The investment manager will try to protect the value of your investment against such changes, but it may not succeed.

Derivatives: The use of derivatives can result in greater fluctuations of the share classes value and may cause the share class to lose as much as or more than the amount invested in the derivatives.

For further explanation on the risks associated with an investment in the fund, please refer to the section entitled "Risk Factors" in the prospectus.

Charges

One-off charges taken before or after you invest	
Entry charge	none
Exit charge	none
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
Ongoing charge	0.83%
Charges taken from the fund under certain specific conditions	
Performance fee:	none

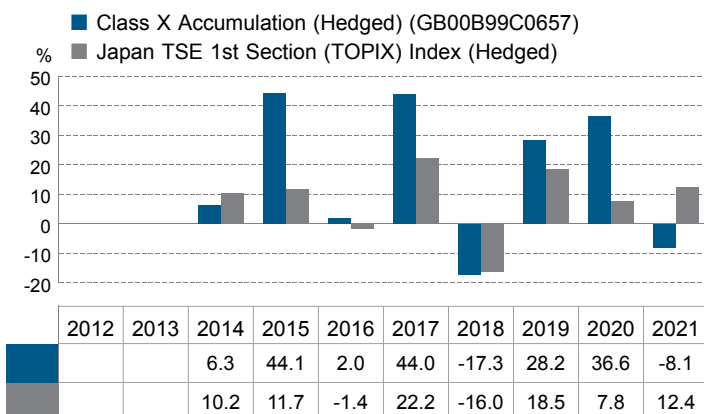

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

Entry and exit charges shown are the maximum that might be taken out of your money. In some cases, you might pay less and you should speak to your financial adviser about this.

The ongoing charge is based on expenses for the 12 month period ending January 2022. This figure may vary over time.

For more information about charges, please see the 'Fees and Expenses' section in the fund's prospectus and relevant appendix.

Past Performance

The fund was launched on 8 October 1996 and the share class began issuing shares on 1 March 2013.

Past performance has been calculated in GBP.

The performance reflects all fees and charges payable by the fund but does not reflect any entry or exit charge that might be payable.

Past performance is no guide to future returns and may not be repeated.
